

Drone Preflight Checklist

Complete the Following Before Each Flight

- Inspect drone for defects
- Inspect propellers for damage, tightened and locked
- Drone battery fully charged and correctly installed
- Transmitter battery fully charged
- Smartphone fully charged (when applicable)
- Firmware up to date (when appropriate)
- SD card empty and secure (photography)
- Weather okay (no storms, rain, excessive wind, etc.)
- Camera lens cap and gimbal guard removed (when camera used)
- Airmap or B4UFLY app installed on phone and airspace checked, authorizations received
- Transmitter and drone turned on and communicating (check user manual for your drone)
- Area scanned for people and obstacles
