Angular Migration Preparation Checklist

https://medium.com/panaseer-labs-engineering-data-science/preparing-a-large-scale-application-for-angular-migration-ace75170a3bf

- [ ] Use a modern Javascript flavour (Typescript/ES6)
- [ ] Replace IIFE with import/export modules
- [ ] Use components instead of directives or controllers
- [ ] Move side effect free functions from services to utility files and import where needed
- [ ] replace factories and in some cases services with classes
- [ ] use decorators to reduce syntax differences between the frameworks
- [ ] evaluate and remove use of functionality no longer available in Angular
- [ ] evaluate third party libraries compatibility with Angular
- [ ] decide the migration time frame
- [ ] decide the order to approach migration
- [ ] decide beforehand whether to migrate or rewrite
