# A Checklist to Help Raise Great Kids

- [ ] 1. Love and Logic parents remember that parents can't teach for teachers and teachers can't parent for parents. Remember that teachers and parents can't learn for kids no matter how much we love them.
- [ ] 2. Show the same amount of love for your children regardless of their success in school.
- [ ] 3. Expect your children to do their share of the chores at home.
- [ ] 4. Spend some time each day talking with excitement about your work and your day. They will want to imitate you and will soon begin to talk about school and their day.
- [ ] 5. Take turns reading to each other every day.
- [ ] 6. Have your children teach you something they have learned at school. Do this once per week.
- [ ] 7. Encourage your children to do things that "charge their batteries." Encourage them to try many different activities as a way of discovering interests and talents. Remind them that they will build their careers around their talents, not around their weaknesses.
- [ ] 8. Provide a time and place for homework. Expect that they will study. Allow them to study either by writing the assignments or thinking hard about them for a reasonable amount of time.
- [ ] 9. Don't pay your children for good grades and don't punish for bad grades. Be excited about the good grades and sad for the children about their bad grades.
- [ ] 10. Have your children bring home papers.
- [ ] 11. Expect this Love and Logic program to take about one year before you see good results. Remember that children who have a hard time at school need to get away from it for a while each day. More homework and problems at home about school won't help.
- [ ] 12. Love and Logic parents remember that highly successful people put most of their efforts into their talents and maintain minimal standards on everything else.
