## **RV SETUP CHECKLIST**

Remember to take your time

## Three checks before you chock!

1. Check to make sure you can reach the water & electrical connections
2. Check to make sure your slides have enough room to clear obstacles
3. Check to make sure the RV is level left to right
4. Chock your tires
5. Disconnect trailer from tow vehicle
6. Level the trailer front to back
7. Deploy stabilizers
8. Connect to the water and electrical panel
9. Check inside for obstacles before operating slides
10. Deploy RV sides
11. Connect sewer hose
