Checklist Based Testing

A type of software testing, checklist-based testing, is based on The pre-planned "to-do" list of tasks called a checklist, Which enumerates all the conventional actions performed Phase-wise during the testing cycle.

Reasons for Defects

- [ ] Due to variation in data.
- [ ] Difference in sequence of standardised procedures or Workflow.

Aduantages of using checklist based testing

- [ ] Takes out most of the flaws, which ensures excellent Coverage.
- [ ] Cuts down costs and helps meet deadlines.
- [ ] Helps in better integration of new testing personnel into the Organization.

Difficulties encountered during checklist Based testing:

- [ ] The difference in checklist interpretation leads to different Approaches being used to accomplish the mentioned tasks.
- [ ] Regular improvements in testing processes require the Checklist to be upgraded over time to ensure thorough Testing.
- [ ] Complex or advanced level tests can affect the Reproducibility of the results.
- [ ] The utility of the checklist is questionable for holistic Testing over the entirety of SDLC.
