

Checklist Based Testing

A type of software testing, checklist-based testing, is based on The pre-planned "to-do" list of tasks called a checklist, Which enumerates all the conventional actions performed Phase-wise during the testing cycle.

Reasons for Defects

- ☐ Due to variation in data.
- ☐ Difference in sequence of standardised procedures or Workflow.

Aduantages of using checklist based testing

- ☐ Takes out most of the flaws, which ensures excellent Coverage.
- ☐ Cuts down costs and helps meet deadlines.
- ☐ Helps in better integration of new testing personnel into the Organization.

Difficulties encountered during checklist Based testing:

- ☐ The difference in checklist interpretation leads to different Approaches being used to accomplish the mentioned tasks.
- ☐ Regular improvements in testing processes require the Checklist to be upgraded over time to ensure thorough Testing.
- ☐ Complex or advanced level tests can affect the Reproducibility of the results.
- ☐ The utility of the checklist is questionable for holistic Testing over the entirety of SDLC.
