

Key Features of Adobe Captivate 9 That Enhance Instructional Design

Here are the five fabulous features of Adobe Captivate 9 that enhance instructional design.

Adobe Captivate Draft

- ☐ Adobe Captivate Draft, allows you to create a storyboard directly in the authoring tool with e-learning objects, question slides, and branching abilities reducing our extra resources, time, and efforts

Device-aware Delivery

- ☐ Captivate offers the feature to develop responsive courses that can be accessed on any mobile device, laptop, or tablet

Multimedia Integration

- ☐ Multimedia Integration feature in Captivate will provide audio-text captions, text-to-speech capabilities, and pan and zoom support.

Branch-aware Quizzing

- ☐ This unique feature will allow the learner to take the pre-test based on which it will point out to the modules the learner will have to take. After they complete the module, learners have to take a quiz again to check their progress.

Geo-location Support

- ☐ This feature helps you to detect and incorporate location-specific content in the course and location-based e-learning

Make and share your own e-learning content

activities.
