Foundation Maintenance Checklist

Check these common foundation issues to help insure a long lasting foundation.

Gaps in between foundation and soil	
Check moisture level; often times foundation issues come from to much moisture or to little	
Check drainage; make sure that your gutters are draining at least 5-10 feet away	
Check plants and trees to make sure no roots are growing into the foundation	
Check the plumbing. Leaks can cause massive problems in foundations and need to be looked at ASAP	
Water during the dry season! This will help with nearly all problems	
Inspect home for damage or cracks	
Insure the house is sitting on the proper slope	
Install root barrier if trees become to much	
Check for stuck or hard to open doors around the house
