Foundation Maintenance Checklist

Check these common foundation issues to help insure a long lasting foundation.

Gaps ii	in between foundation and soil
Check	moisture level; often times foundation issues come from to much moisture or to little
Check	drainage; make sure that your gutters are draining at least 5-10 feet away
Check	plants and trees to make sure no roots are growing into the foundation
Check	the plumbing. Leaks can cause massive problems in foundations and need to be looked at ASAP
Water	during the dry season! This will help with nearly all problems
Inspec	ct home for damage or cracks
Insure	the house is sitting on the proper slope
Install	root barrier if trees become to much
Check	for stuck or hard to open doors around the house
