Speed Up Your WordPress Checklist

This is a complete guide on how to speed up WordPress.

- [ ] Choose the right web host and plan
- [ ] Use a mobile responsive, light design
- [ ] Check how plugins used impact the speed
- [ ] Use a light share plugin, not official buttons
- [ ] " Save for web" to reduce image size
- [ ] Resize images to the exact dimensions
- [ ] Use lazy loading if image heavy site
- [ ] Enable caching, minify and use CDN
- [ ] Remove and eliminate inessentials
- [ ] Keep your WordPress optimized day to day
- [ ] For recommended plugins visit howtomakemyblog.com
