Pros and cons of Hybrid Apps

Pros of Hybrid Apps

- [ ] Cheapest App Development.
- [ ] Time required to develop hybrid apps is less because developers only have to build a shellcode.
- [ ] Simpler to maintain hybrid apps.
- [ ] Use device's features such as the GPS, camera, device settings and more to deliver experience.
- [ ] Faster development.

Cons of Hybrid Apps

- [ ] Hybrid apps do not work offline.
- [ ] Features specific to IOS may not work well for Android devices (and vice versa).
- [ ] Deployment process is simple but not the development process.
- [ ] Slower Performance.
- [ ] Need a bigger team of developers.
