Top Tools To Boost Your Web Development Workflow

TRELLO

A wonderful project management tool, to manage development workflow, tasks, marketing projects, online businesses and more.

REDASH

A great open-source tool for visualizing data in a dedicated dashboard. It integrates with popular data sources - MySQL PostgreSQL, MongoDB, and more.

DRAW.IO

A great tool for prototyping and architecture design. Great for designing processes, and views before implementing them with code.

SLACK

A new and seamless way to communicate internally with team members, set goals, schedule meetings, and more.

ZAPIER

Zapier moves info between web apps automatically by integrating more than 750 apps. Creates automated processes and **Make and Share Free Checklists**
