

Podcast Equipment Checklist

Checklist to help get you started as a podcaster

Computer / Laptop

- ☐ Something to record your podcasts onto and upload your .mp3 file.

Microphone

- ☐ The main piece of equipment is a microphone. Don't use your computer's built-in one but get a USB microphone to get started.

Audio Interface

- ☐ Essential part of your computer based recording setup and bridges between your microphone and your computer.

Mixer

- ☐ Put your podcast together giving you control over levels, inputs, outputs, and much more.

Pop Filter / Windscreen

- ☐ Minimise or prevent unwanted sounds and filters out plosives from your voice.

Headphones

- ☐ Help adjust the way you're using the microphone.

Mic Stands

- ☐ Easily move the microphone to a comfortable position.

Recording software

- ☐ Digital audio workstation (DAW) software used for recording, editing and producing audio files.

Shock Mount

- ☐ Cradle that holds your microphone and cuts down on vibrations.

Soundproofing

- ☐ A quiet space or consider investing in some soundproofing material. Cut down on background noise and improve the sound quality.
