Design Acceptance Checklist

Please Ensure :

- [ ] The components are in line with the material design components.
- [ ] There is no overlap between the components.
- [ ] Outer margin is 16dp.
- [ ] The inner margin is 8dp.
- [ ] The fonts are all the same.
- [ ] The colours used corresponds to the config theme.
- [ ] The font size is in line with android standards.
- [ ] The Error screen is supplied with the design, if applicable.
- [ ] The Loading State screen is supplied with the design, if applicable
- [ ] The Empty State screen is supplied with the design, if applicable.
- [ ] All icons are of the right size relative to other icons in the same category.
- [ ] The design provides a good user experience and determines if it can be improved without affecting the requirement.
- [ ] That the screen size used for the design is 360px wide.
- [ ] That the margins of the edges of the screen are evenly spaced and follows Android standards
- [ ] UPPER CASE characters are used in very restricted cases — acronyms, buttons for example.
- [ ] Any icons and images present are in. svg format.
- [ ] Request a design prototype, if possible.
- [ ] Or Determine whether an entirely new component is present in the design that has not been previously used and whether any existing components can be used to achieve the requirement.
