## **Health Inspection Checklist**

Restaurant and beverage health inspection checklist. Free to download, save or copy.

Receiving
Internal temperatures are sampled from all arriving shipments of uncooked meat, poultry and fish, and must register 41 degrees F or colder.
Accurate thermometers are available for sampling internal temperatures of food shipments.
Receiving area is clean and well lit (to discourage pests).
Dry Storage
All inventory is labeled and dated.
All containers are airtight and undamaged.
Dated containers are arranged for rotation on a first in, first out (FIFO) basis.
Dry foods are stored off the floor and away from walls.
Chemical cleaners are stored away from food and labeled.
There is no sign of pest presence in storage area (check beneath and behind racks).
Refrigerated Storage
All inventory is labeled and dated. All potentially hazardous foods (meat, soup, tuna salad, etc.) more than seven days old have been thrown out.

All raw meat, poultry and fish is stored separately or below fresh, ready-to-eat foods.

Prepared foods are stored in shallow pans, uncovered (to accelerate cooling to	o safe cold-storage temperature).
All food is stored in leak-proof containers, tightly covered with lids, plastic wra	p or aluminum foil.
Preparation	
Every employee employs proper hand-washing technique: Scrubs hands for 20 towels, Turns off water with the paper towel	seconds with soap and water, Uses paper
Food contact surfaces are in good repair, and are cleaned and sanitized regula	arly.
Measures to prevent cross-contamination are in place. For example, cutting be and vegetables; countertops and cutting boards are washed, rinsed and sanition	
Pre-prepared foods are reheated to 165 degrees F to kill any bacteria before so	erving.
Steam tables (if present) are kept at a minimum temperature of 140 degrees F line are checked regularly.	and the temperatures of various foods on the
Personnel with infections or communicable diseases are restricted from food	handling areas.
All food preparation sinks, dishwashers and ice machines are equipped with ir	ndirect drains to prevent sewage backups.
After washing, dishes and utensils are sanitized with chemicals (e.g., chlorine) 190 degrees F)	or by separate rinse in very hot water (180 to
Restrooms & Waste Disposal	
Staff restrooms are equipped with cold and hot running water, the hot water is sinks are stocked with soap and paper towels.	between 100 and 120 degrees F, and the
Garbage does not pass through food preparation areas on its way to disposal.	
Garbage containers are covered and leak-proof.	
All outside garbage containers have tight-fitting lids.	
Garbage containers are cleaned and sanitized regularly, away from food prepared	ration and storage areas.
All employees follow proper hand-washing procedures after handling garbage
