

# How to add a Google Map to WordPress

If you have your site hosted on WordPress and need to add a Google Map to show your business' locations, there are a few simple ways to do it.

## Use a Store Locator/Wordpress Plugin

---

- Select a store locator that's compatible with Wordpress, like Storemapper
  - Create an account and log in
  - Install it on your WordPress page
  - Upload your store's locations
  - Customize your map according to your brand's guidelines
  - Save and publish
- 

## Embed your map without a WordPress plugin

---

- Go to <https://www.google.com/maps>
  - Log into your Google account
  - Create a map
  - Make your map public
  - Generate an embed code by clicking on "Embed a map"
  - Copy the code
  - Add your Google Map API key (if you have one) to the embed code
  - Log into your Wordpress account
-

Access the WordPress page editor

Add the embed code to the Text tab

---
