

How to add Google Maps to a Squarespace Site

If you have a Squarespace page and want to embed a Google Map on it, the good news is that this is easy with a plugin. Here's how you can add a Google Map to your Squarespace site.

Using Storemapper

- ☐ Sign up for Storemapper
 - ☐ Get your embed code at your store's database
 - ☐ Go to the admin dashboard
 - ☐ Select "pages" and then "add page"
 - ☐ Name your new page and click save
 - ☐ Go back to the admin page
 - ☐ On the navigation menu, select the new page created
 - ☐ You will see a black bar. Hover the mouse over it and click on the black insert point
 - ☐ When the menu opens, select "Code"
 - ☐ Set the source to HTML
 - ☐ Paste the copied embed code on the text box and save
 - ☐ Save page's changes
 - ☐ Click on "View page" to check if the map is rendering correctly
-

Using an embedded Google Map

- ☐ Create a account via Storemapper and simply embed the code onto your Squarespace site
