

# How to add Google Maps to a Squarespace Site

If you have a Squarespace page and want to embed a Google Map on it, the good news is that this is easy with a plugin. Here's how you can add a Google Map to your Squarespace site.

## Using Storemapper

---

- Sign up for Storemapper
  - Get your embed code at your store's database
  - Go to the admin dashboard
  - Select "pages" and then "add page"
  - Name your new page and click save
  - Go back to the admin page
  - On the navigation menu, select the new page created
  - You will see a black bar. Hover the mouse over it and click on the black insert point
  - When the menu opens, select "Code"
  - Set the source to HTML
  - Paste the copied embed code on the text box and save
  - Save page's changes
  - Click on "View page" to check if the map is rendering correctly
- 

## Using an embedded Google Map

---

- Create a account via Storemapper and simply embed the code onto your Squarespace site
