

How to add Google Maps to a Squarespace Site

If you have a Squarespace page and want to embed a Google Map on it, the good news is that this is easy with a plugin. Here's how you can add a Google Map to your Squarespace site.

Using Storemapper

- Sign up for Storemapper
 - Get your embed code at your store's database
 - Go to the admin dashboard
 - Select "pages" and then "add page"
 - Name your new page and click save
 - Go back to the admin page
 - On the navigation menu, select the new page created
 - You will see a black bar. Hover the mouse over it and click on the black insert point
 - When the menu opens, select "Code"
 - Set the source to HTML
 - Paste the copied embed code on the text box and save
 - Save page's changes
 - Click on "View page" to check if the map is rendering correctly
-

Using an embedded Google Map

- Create a account via Storemapper and simply embed the code onto your Squarespace site
