Magic Page Plugin - Website Setup

- [ ] Install the Plugin: Purchase Magic Page Plugin (MPP) online and download it. Install the plugin onto your WordPress site.

- [ ] Activate the Plugin: Copy and paste your API Key into the appropriate area to activate the plugin.

- [ ] Install the Database: Click and install your State database or all the databases for every State in the USA, or any other country depending on your coverage area.

- [ ] Get Google Maps API Key: Search for "Google Maps API Key" in Google, create and activate the key, then paste it into your settings.

- [ ] Set Locations: Select your office or multiple office locations, then set the miles radius or leave it set to 1000 miles to cover the whole State.

- [ ] Add Content: Add your content into the Magic Page using shortcodes for locations, and the page will automatically build a page for every single town and village in your selected area, the whole state.

- [ ] Remember, if you find anything difficult or get stuck anywhere, there are numerous support systems in place. The Magic Page Plugin has a customer Facebook community where you can get answers to your questions 24/7 https://www.facebook.com/groups/magicpage.

- [ ] Alternatively, Magic Page Plugin has a support desk https://mikemartin.zendesk.com.
